

Harrow

Ribbed Solid Wood Pendant Light

Harrow is a Japandi-style pendant: a dome shaped on the lathe from one block of solid wood, with ribs running over its whole surface. Above a desk or a worktop, it aims its light downwards, onto whatever you are working on.

SIZES AND FINISHES

Two sizes, 43 cm and 55 cm. The 43 cm is enough above a desk; the wider 55 cm has more presence in the middle of a hallway. For the tone, look at the wood already in the room, floor or furniture, and choose whichever comes closest to it.

SPECIFICATIONS

Size

SIZES	43 cm or 55 cm, depending on variant
DROP	Fixed length, not adjustable
SHAPE	Ribbed dome, in one piece of solid wood

Light

BULB	E27 fitting, bulb supplied
DIRECTION	Downwards
DIMMER	Not compatible

Materials and fitting

MATERIAL	Solid wood, turned from a single piece
FINISHES	Pale wood or walnut
POWER	Hardwired, 110–240 V
PROTECTION	IP20: indoors only
FITTING	An electrician can do it if you prefer

IN THE BOX

Harrow pendant, in the wood and size you ordered, cable, ceiling rose, fixing screws, E27 bulb.

DIMENSIONS

Dimensions in cm · drawing not to scale

AT HOME

IN DETAIL

The light

An E27 bulb is supplied, and any standard E27 bulb can replace it later. The dome sends the light down, so it lights what sits beneath it rather than the whole room, over an area of around 5 to 10 m². It is not dimmable.

Materials

The whole pendant is solid wood, right up to the piece that holds it to the ceiling. It comes in pale wood or in walnut.

Fitting

The drop is fixed and cannot be adjusted, so bear it in mind under a low ceiling. It connects to your existing ceiling light point (110–240 V); an electrician can do this for you if you prefer. Indoor use only (IP20).

Indicative measurements: stone, blown glass and wood are natural materials, so no two lights are quite the same.
