

Moreton

Cordless Rechargeable Picture & Mirror Light

Moreton is a battery light bar to fix above a painting or a mirror, in a sitting room as much as a hallway. Its slim bar stays discreet on the wall.

SIZES AND FINISHES

Three lengths: 68, 98 and 128 cm. The longer the bar, the more light it gives. Black stays discreet against a dark frame; gold suits a gilded one.

SPECIFICATIONS

Size

LENGTHS	68 / 98 / 128 cm
HEIGHT	5 cm
MOUNT	small fixing at the centre of the bar

Light

LIGHTING	warm white LED, built into the bar
POWER AND OUTPUT	about 12 W / 1,320 lm (68 cm), 18 W / 1,980 lm (98 cm), 24 W / 2,640 lm (128 cm)
CONTROL	touch the bar to switch on and dim
RUN TIME	up to 4 hours per full charge
POWER	on-board battery, USB recharging

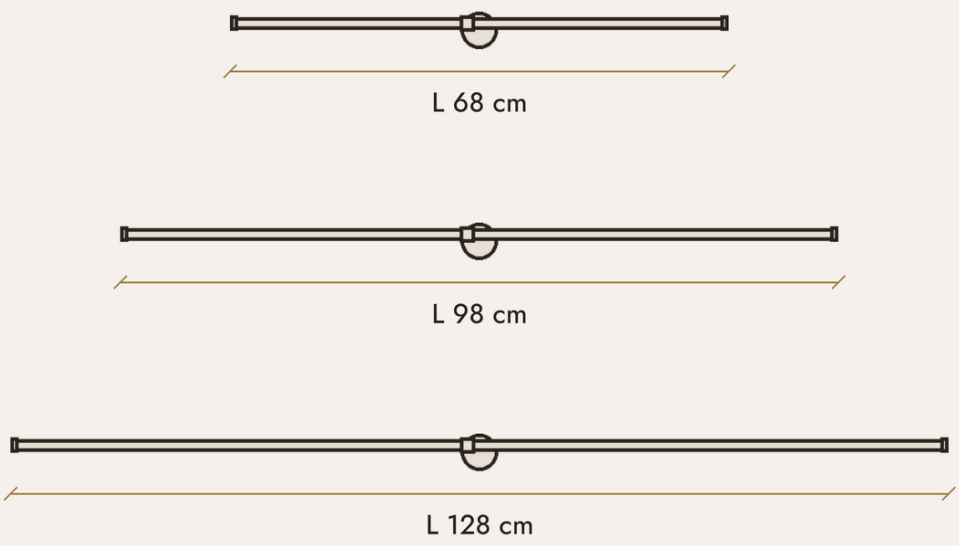

Materials and fitting

MATERIALS	metal, acrylic diffuser
FINISHES	black or gold
FIXING	screws or adhesive
RATING	IP44

IN THE BOX

Moreton light bar, rechargeable battery already built in, warm white LED already built in.

IN DETAIL

The light

The built-in LED gives a warm white, and there is nothing to reach for: a light touch on the bar turns it on, and your fingertip sets the brightness too. Output by length: about 12 W and 1,320 lm (68 cm), 18 W and 1,980 lm (98 cm), 24 W and 2,640 lm (128 cm).

Materials

A metal bar 5 cm high, closed by an acrylic diffuser, in black or gold. It holds to the wall by a single fixing placed at its middle. Rated IP44.

Fitting

It recharges over USB, much like a phone, and then runs for up to 4 hours. To fix it, you have two options: screws, or adhesive if you would rather not drill.

Indicative measurements: stone, blown glass and wood are natural materials, so no two lights are quite the same.
