

Padstow

Black Linear Outdoor Wall Light, IP65

A slim light bar for outdoors, to fit beside a garage door, under a canopy or on a gate pillar. Being black, it blends into a dark wall or timber cladding.

SIZES AND FINISHES

Eight lengths, from 30 to 200 cm (30, 60, 80 and 100 cm, then 120, 150, 170 and 200 cm), all in black. The shortest suits a pillar; the longer ones run under the eaves or a pergola.

SPECIFICATIONS

Size

LENGTHS	30 to 200 cm: 30, 60, 80 or 100 cm; 120, 150, 170 or 200 cm
ORIENTATION	upright or horizontal

Light

SOURCE	integrated SMD LED
LIGHT OPTIONS	two whites (cool, warm), dimmable or RGB
MOTION SENSOR	optional on every version
OUTPUT	about 226 lm (30 cm, single colour)

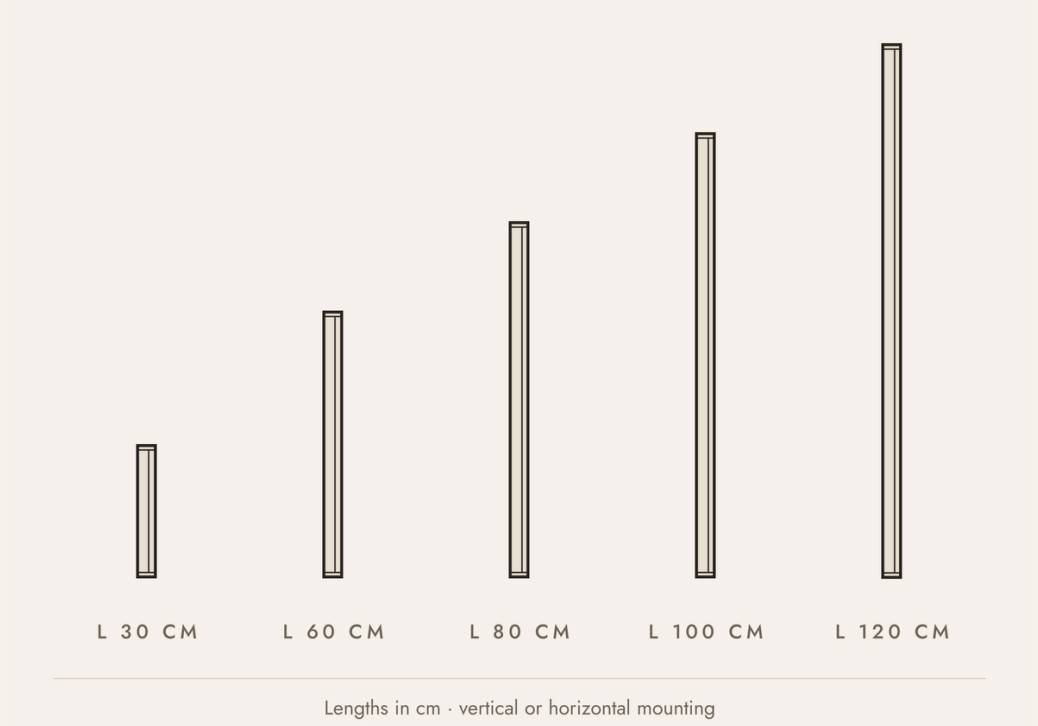

Materials and fitting

BODY	black metal, rust-resistant
DIFFUSER	acrylic
RATING	IP65, for outdoor use
SUPPLY	hardwired, 110–240 V; an electrician can do it if you prefer

IN THE BOX

Padstow wall light, ready to be connected, LED already in place.

IN DETAIL

The light

The LEDs are built into the bar. For the tone, pick cool white or warm white for a steady glow, the dimmable version if you like to soften it at night, or RGB if you want colour in a courtyard. A motion sensor can be added to any of them: by a garage, the bar comes on as you pull in. As a guide, the 30 cm bar in a single colour gives around 226 lumens.

Materials

The body is black metal, treated against rust, and the light passes through an acrylic diffuser. Its IP65 rating means it can be fitted outdoors, in the open.

Fitting

It is hardwired to the mains, 110-240 V; an electrician can do this for you if you prefer. It mounts just as well vertically as horizontally.

Indicative measurements: stone, blown glass and wood are natural materials, so no two lights are quite the same.
