

Sedbergh

Up and Down Wall Light in Marble & Copper

Picture it in a corridor, on a landing or in a study: Sedbergh is a narrow wall light that stands upright on the wall. Its light comes out at both ends, upwards and downwards.

SIZES AND FINISHES

It comes in heights of 40, 50, 60 and 80 cm, and never sits more than 10 cm proud of the wall, so it fits easily in a passageway. Measure the free height of the wall before choosing: the 40 and 50 cm suit a low stretch of wall, between two doors or beside a window; the 60 and 80 cm need a wall with more height below the ceiling. Gold brings a warm gleam, black a more graphic stroke.

SPECIFICATIONS

Size

HEIGHTS	40 / 50 / 60 / 80 cm
PROJECTION	10 cm
SHADE	Ø 6 cm
SUGGESTED ROOM	5 to 10 m²

Light

SOURCE	integrated LED, supplied

AT HOME

IN DETAIL

The light

A single integrated LED source, supplied, shines from both ends. It is not dimmable. Think of it as accent lighting, suited to a room of around 5 to 10 m².

Materials

Two materials meet here: a small cylinder of natural marble, 6 cm across, which acts as the shade, and a stem of solid copper finished with gold or black plating. As marble is a natural stone, its markings change from one light to the next, and yours will have its own.

Fitting

It fixes to the wall and runs on 90–260 V, so it works on UK 230 V mains. For dry rooms indoors only (IP20).

Indicative measurements: stone, blown glass and wood are natural materials, so no two lights are quite the same.
