

Truro

Colour-Changing Linear Outdoor Wall Light

Truro is an outdoor wall light in the form of a slim bar, to fix upright beside a gate, a garage door or along an outside staircase. Its white adjusts from warm to cool, and it can switch to colour too.

SIZES AND FINISHES

The profile never varies, 8 cm across and 4.5 cm from front to back; only the height changes, with ten lengths from 30 to 240 cm. To choose, stick a strip of masking tape on the wall at the length you have in mind, then step back a few paces: the right length shows straight away.

SPECIFICATIONS

Size

HEIGHTS	ten, from 30 to 240 cm
CROSS-SECTION	width 8 cm, depth 4.5 cm

Light

SOURCE	integrated RGB and tunable-white LED
WHITE	from 3,000 to 6,000 K
COLOURS	RGB mode
CONTROL	remote handset

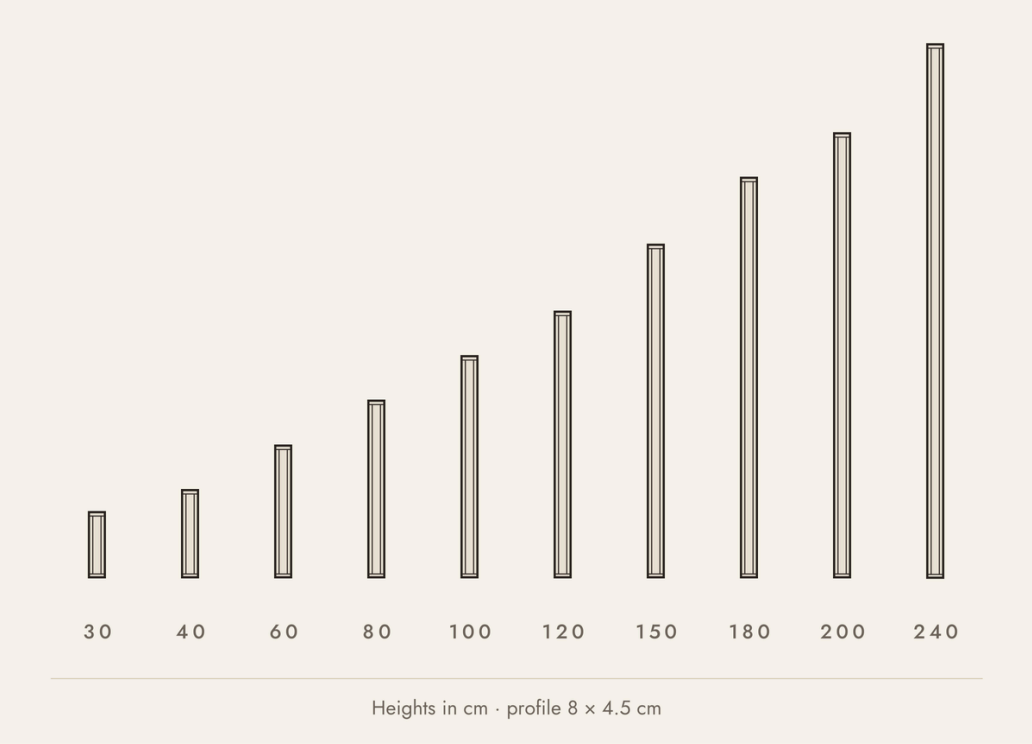

Materials and fitting

BODY	solid aluminium with a thermolacquered finish that resists corrosion
DIFFUSER	sealed acrylic
RATING	IP65/IP66, for outdoor use, even on an exposed wall
VOLTAGE	AC 90–260 V
FITTING	wall-mounted; an electrician can do it if you prefer

IN THE BOX

Truro wall light, LED already built in, remote that sets the white and the colours.

IN DETAIL

The light

The LED is built in. Its white can be set anywhere between 3000 K and 6000 K, and an RGB mode adds colour, all from the remote handset.

Materials

The bar is solid aluminium, finished with a powder coat that resists corrosion. Its acrylic diffuser is sealed in, and its IP65/IP66 rating makes it suitable for outdoor use, even on an exposed wall.

Fitting

It fixes to the outside wall and connects to an existing light point (AC 90–260 V); as with any outdoor connection, an electrician can do this for you if you prefer.

Indicative measurements: stone, blown glass and wood are natural materials, so no two lights are quite the same.
