IN DETAIL

The light

It arrives with its bulb, for a single light point, and suits a room of around 5 to 10 m².

Materials

The blown glass, run through with flutes, sits on a metal fixing.

Fitting

It fixes to the wall on its metal plate and runs on 90–260 V, which covers UK 230 V mains.

Indicative measurements: stone, blown glass and wood are natural materials, so no two lights are quite the same.
