

WALL LIGHT

# Clare

## Two-Light Frosted Glass Wall Light

A slender wall light: a curved metal arm with a small frosted-glass diffuser at each end, one set higher than the other. On a study or sitting-room wall, it sends light towards the ceiling and the floor at the same time.

### SIZES AND FINISHES

One size, in two metal finishes: black or gold, with the same frosted-glass diffusers.

### SPECIFICATIONS

#### Size

| | |
|---|---|
| HEIGHT | 55 cm |
| WALL PLATE | Ø 10 cm |

## AT HOME

## IN DETAIL

### The light

Each diffuser takes one G9 LED bulb, and both bulbs come in the box. There is no switch on the light itself: it runs from the room's wall switch. It does not work with a dimmer.

### Materials

Aluminium for the structure, frosted glass for the two small diffusers.

### Fitting

It fixes to the wall and connects to a fixed electrical supply (90-260 V); an electrician can do this for you if you prefer. For indoor rooms.

Indicative measurements: stone, blown glass and wood are natural materials, so no two lights are quite the same.
