

WALL LIGHT

Ely

Travertine Disc Wall Light with Wooden Sphere

A small wooden ball at the heart of a stone disc: this wall light never shows its LED. In an entrance hall or a dining room, it is the travertine itself that lights up, in warm white.

SIZES AND FINISHES

The disc measures 25 cm in every case; only the ball changes: walnut, a dark tone, or natural wood, a pale one.

SPECIFICATIONS

Size

SHAPE	round, with a sphere at the centre of the disc
DISC DIAMETER	25 cm

Light

LED	built in, supplied
COLOUR	warm white
EFFECT	indirect light, LED out of sight
VOLTAGE	230 V

IN DETAIL

The light

It runs on a warm white LED, built in and supplied. Tucked behind the wooden ball, it stays out of sight and causes no glare.

Materials

Each disc is travertine, a natural stone: no two wall lights have quite the same tiny holes or colour, and yours will differ a little from the photo. The central ball is wood.

Fitting

It fixes to the wall and connects to a 230 V supply; an electrician can do this for you if you prefer. IP20: dry rooms indoors.

Indicative measurements: stone, blown glass and wood are natural materials, so no two lights are quite the same.
