

WALL LIGHT

Ripon

Half-Moon Travertine Wall Light

A 20 cm half-moon of travertine, to fix in a dressing room or a guest bedroom. The light does not come at you head-on: it draws an indirect halo on the wall.

WHERE TO PUT IT

In a study under the eaves or a reading nook, it adds a touch of light to a stretch of wall, beside a window for example.

SPECIFICATIONS

Size

WIDTH	20 cm
HEIGHT	13 cm
DEPTH	5 cm
SUGGESTED ROOM	3 to 5 m²

Light

BULB	one G9, supplied
EFFECT	indirect halo, upwards, downwards or sideways depending on how it is mounted

IN DETAIL

The light

It takes a G9 bulb, included. You decide where the light goes when you put it up: just turn the fitting to light towards the ceiling, the floor or to one side. One light is enough for a space of 3 to 5 m².

Materials

Ripon is made of natural travertine in a sand tone. Up close you can see the grain of the stone and the small cavities that mark its surface; their pattern never repeats from one light to the next, so yours will have a look of its own, slightly different from the photo.

Fitting

It fixes to the wall and accepts 90 to 260 V. An electrician can connect it for you if you prefer.

Indicative measurements: stone, blown glass and wood are natural materials, so no two lights are quite the same.
