

WALL LIGHT

Rosedale

Travertine Wall Light with Opal Glass Globes

In a sitting room, a dining room or a stairwell, Rosedale pairs a travertine body with opal glass globes, one to three depending on the version. The white opal glass hides the bulb and softens the light.

SIZES AND FINISHES

The single, with one globe, stands 18 cm tall and slips onto a narrow stretch of wall, between two windows for instance. The double (28 cm) and triple (48 cm) draw a stronger line; laid flat, they stretch out above a low bookcase. All three are 10 cm wide.

SPECIFICATIONS

Size

WIDTH	10 cm on every version
SINGLE (1 GLOBE)	18 cm high, 0.8 kg
DOUBLE (2 GLOBES)	28 cm high, 1.5 kg
TRIPLE (3 GLOBES)	48 cm high, 2.6 kg

Light

BULBS	G9, one per globe, supplied
WATTAGE	7 W at most per bulb
DIMMING	yes, if your switch is a compatible dimmer; that switch is not supplied
DIFFUSERS	opal glass globes

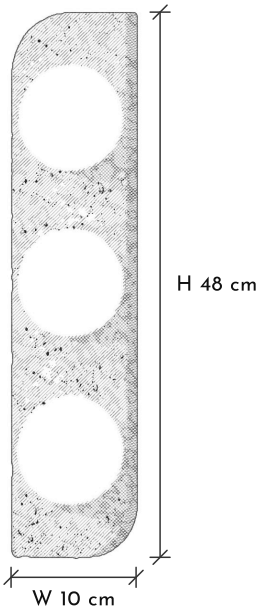

Materials and fitting

BODY	genuine travertine, warm beige, varied veining
BASE	solid wood
MOUNTING	on a wall or ceiling, upright or level
RATING	IP20, dry rooms, not in bathroom zones

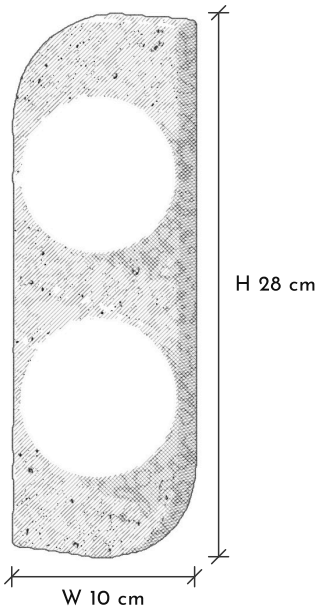

IN THE BOX

Rosedale wall light, in its single, double or triple version, one G9 bulb per opal globe.

AT HOME

IN DETAIL

The light

Each globe takes a G9 bulb of up to 7 W, and the bulbs come in the box. You can run it from a dimmer switch as long as the dimmer is compatible; the dimmer itself is not supplied.

Materials

The body is cut from real travertine in a warm beige and sits on a solid wood base. The veining never repeats, so yours will not be an exact copy of the photograph, which is precisely what makes it yours.

Fitting

It fixes to a wall or a ceiling, vertically or horizontally, depending on the look you are after. Rated IP20, it is for dry rooms only and not for bathroom zones. An electrician can fit it for you if you prefer.

Indicative measurements: stone, blown glass and wood are natural materials, so no two lights are quite the same.
